

GalPulp

A series of high quality, cationic corn based starches for wet-end applications

GalPulp product line was developed to improve retention, drainage and dry strength in paper and paperboard production.

Technical Information

Appearance: Powder, white to slightly yellow in color

Analytical Data

Moisture (%) 11.0

Nitrogen (% DB) 0.15-0.45

pH 3.5-6.5

Major Benefits

- ✓ Retains its effectiveness over a large pH range making it very beneficial for use in acid, neutral, and alkali papermaking
- ✓ Available with various degrees of substitution (DS), according to the needs of individual mills
- ✓ Retains all types of fillers, such as clays, PCC and titanium dioxide
- ✓ Works especially well in ASA/AKD size emulsification applications
- ✓ Improves dry strength properties such as ply-bond and tensile strength

Storage: Store in proper warehouse conditions

Shelf Life: Best used within twelve (12) months from date of production

Packaging: Bags – 25 kg / Big bags – 750 kg or 875 kg
