Fruitose® HiSweet® NutraGal NutraMate

Sweetening Solutions for Beverages

Being for several years involved in the sweeteners business through its crystalline fructose (under Fruitose® brand), Galam has developed expertise in different fields linked to the sweetening process. To this extend, we have been developing recently **tailored-made** sweet blends for the beverage industry, the purpose being to offer innovative solutions that will enable producing healthier products with various claims like:

- *Low / No sugar*
- *Low Calorie*
- *Low GI*
- *Suitable for Diabetics*

Galam is also supplying to the beverages' segment innovative solutions for mineral fortification thanks to a wide range of mineral gluconates and lactates.

Galam will be interested in cooperating with customers in the beverage industry and share the full scope of new solutions for the sweetening and/or fortifying of healthy beverages.

Background

Galam Ltd. is for years the leading supplier of non-GMO Crystalline Fructose (Fruitose®) in Europe. The group integrates NutraGal, a nutraceutical company focusing on developing innovative solutions for mineral fortification and Enzymotec, a biotechnology company providing a unique and better value proposition of emerging lipid-based ingredients such as DHA, PS, or plant-sterols.

Galam's presence in Europe has been strengthened recently through its subsidiary, Eurosweet, an innovative and flexible manufacturer that provides liquid blends for the food and beverage industries.

These recipes illustrate a process which is believed to be satisfactory for general use. Each recipe is offered for your consideration and authorization. For consulting- please advice Food Applications: Tel +972-46375021 or by email: mamanj@galam.co.il
